

Tjeerd Pieter Ritsma

DevOps Cloud Engineer

📍 Leiden, The Netherlands

Profile

I'm an enthusiastic, optimistic and driven person, who's passionate about helping others. For example helping colleagues by automating processes, setting up CI/CD pipelines, configuring Docker containers. Every now and then I'd like to tinker with some new technologies in my spare time and try things out. Since a lot of things are evolving constantly, I think there's always room for improvement of one's skills and knowledge.

The skills stated on this resume are not a definitive list, but rather a selection I deem relevant.

Employment History

📁 DevOps Cloud Engineer @ **Mollie**

📍 Amsterdam, The Netherlands

July 2017 - Present

Part of team 'Platforms', which takes care of the infrastructure. Mainly worked on DevOps tasks with a focus on Docker dev setups and configuring Kubernetes.

📁 Developer @ **Mollie**

📍 Amsterdam, The Netherlands

October 2016 - June 2017

Part of team 'Interactions', which is responsible for everything the users sees. Marketing website / User Dashboard Mostly frontend, but also Backend tasks

When working on the new Marketing website I worked on Infra / Ops tasks. Which led to me switching to the Platforms team.

📁 Backend Developer @ **Studio Projectie**

📍 Leiden, The Netherlands

July 2011 - September 2016

PHP Backend Developer, Occasional frontend tasks

📁 Internship @ **Studio Projectie**

📍 Leiden, The Netherlands

February 2011 - June 2011

During my internship, I created a payment gateway to implement multiple PSP's more easily into our products
